NORAM Awarded Contract for MNB Technology Supply in Korea

NORAM announces that it has signed a contract with HuChems Fine Chemical Corporation of Korea for the supply of a NORAM technology package including the design, proprietary equipment, and commissioning services for a new mononitrobenzene (MNB) plant to be located in Yeosu, Korea.

The plant will have an initial capacity of 150,000 metric tonnes per year of MNB.

This is NORAM's third major MNB project in Asia in the past three years.

NORAM and HuChems Contract Signing Ceremony
